

MISSOURI

2023 State of Computer Science Education

The rapid pace of technological advancement, as seen with the widespread integration of generative artificial intelligence (AI), underscores the need for foundational knowledge in computer science for all students. This report calls upon advocates to embrace the urgency of this matter and revamp school curricula to align with the demands of the 21st century, including requiring that all students learn computer science.

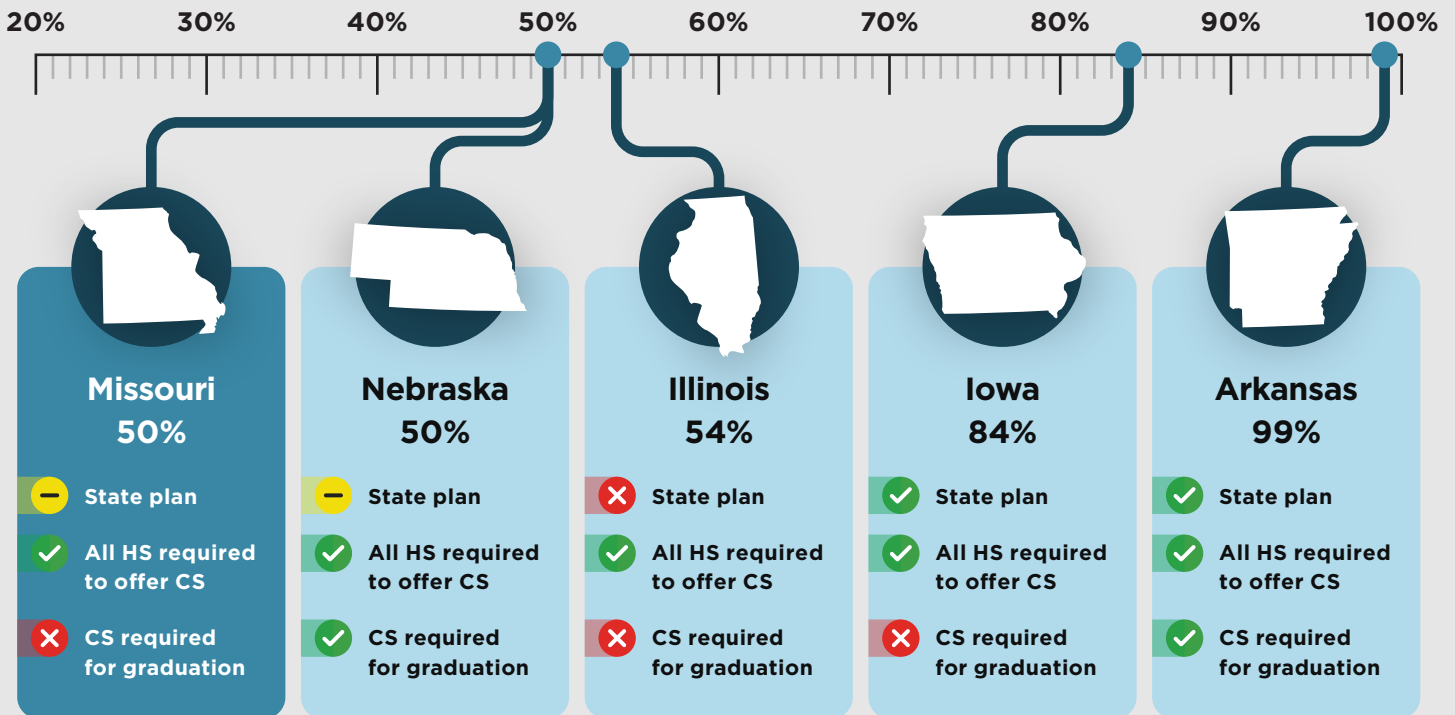

Currently, 57.5% of public high schools in the United States (U.S.) offer a foundational computer science class—an achievement marking the largest percentage growth in the last five years. Across the 35 states* where data is available, 5.8% of high school students are enrolled in foundational computer science. Even with growing access this growth, large disparities still exist, and we must continue to focus on eliminating participation gaps.

9,065
In 2023, MO averaged 9,065 open computing jobs each month

\$93,790
These jobs have an average salary of \$93,790

MISSOURI

Ten Policies to Make Computer Science Foundational

1.

Create a **statewide plan** for K-12 computer science

2.

Define computer science and establish standards for K-12 computer science

3.

Allocate funding for rigorous computer science teacher professional learning

4.

Implement **clear certification pathways** for computer science teachers at elementary and secondary levels

5.

Create university programs to **encourage all preservice teachers** to gain exposure to computer science

6.

Establish **dedicated computer science** positions in a state education agency

7.

Require that all schools offer computer science with appropriate implementation timelines

8.

Allow computer science to count toward a core graduation requirement

9.

Allow **computer science to satisfy an admission requirement** at higher education institutions

10.

Require that all students take computer science to earn a high school diploma

What Has Missouri Done to Advance Computer Science Education?

Missouri has funded computer science education annually since 2020, totaling over \$2M after the 2023 legislative session.

Missouri SB 718 (2022) established the Computer Science Education Task Force to develop a strategic plan for expanding a statewide computer science education program.

How Can Missouri Increase Opportunities for Students?

Missouri should require all preservice teachers to receive instruction in computer science education to ensure there are enough teachers prepared to teach computer science in every school.

Missouri should require all schools to submit computer science course offerings and enrollment to the Department of Elementary and Secondary Education, and this data should be made publicly available.

MISSOURI

Percentage of Public High Schools Offering Foundational Computer Science

Access by School Year

Access by Geography*

Access by School Size*

Small schools are 2 times less likely to offer foundational computer science than medium and large schools

*Data is from the most recent data school year 2021-2022

Participation in AP Computer Science Exams by Gender

Course enrollment data for all foundational computer science courses is not available from Missouri. Nationally, we know that participation in all foundational computer science is broader than AP participation.

Participation in AP Computer Science Exams by Race/Ethnicity

Black students are 1.6 times less likely to take AP computer science exams than their white and Asian peers

- Student Demographics 9-12
- AP Exam Takers
